Monticello Nursery Co.
Monticello, Florida

72 POUNDS OF MAHAN NUTS FROM ONE 9-YEAR OLD MAHAN TREE IN OUR ORCHARD.

You Can Grow the World's Finest Pecans in Your Yard

Big Returns on Small Acreage

CROPS THAT will give a high yield per acre are the order of the day. A small orchard of Mahan pecans, well cared for, will give you a high return per acre, and an excellent NET PROFIT above the cost of care, taxes and interest on your investment. For several years other crops can be grown between the rows as Mahan pecans should be planted 60 feet apart each way, or 12 trees to the acre.

In our Nursery the young MAHAN trees are given every attention needed to make them strong vigorous stock that will transplant well, and give you the quickest possible crops and profits.

A planting of MAHAN trees will look mighty good to you on your place, especially when you see the giant clusters each fall, looking almost like small bunches of bananas. And you won't have to wait long to see these giant nuts on your trees either. Mahan trees are just naturally early bearers, and only take two or three years to start giving you crops.

Two-Year-Old Mahan

MAHAN TREES ARE CHAMPIONS

You can just as well have "Champions" in your yard or orchard, as to have ordinary pecan trees. Plant the vigorous, fast growing Mahan variety. The pecan that was awarded first prize as "Champion" over ALL other varieties, in the "World Wide Contest for the BEST PECAN."

The BEST is usually the cheapest in the long run, and this is especially true in pecans. Once established they will be there for the rest of your life, making crops that are worth more or less according to the variety you have. START RIGHT with MAHANS and you'll profit the most.

F. A. Mahan, President and Manager of the Monticello Nursery Co., and introducer of the famous MAHAN Pecan

FIRST PRIZE IN WORLD- WIDE CONTEST

Mr. F. A. Mahan,
Monticello, Florida.
Dear Sir:—

Inclosed find check as a prize for the BEST PECAN in a world-wide contest. The Mahan is the best pecan judged from ALL standpoints, that we have any record of. If it does as well here as the ones you sent, your fortune is made.

Sincerely,
(Signed) D. F. MOORE.

MAHAN

A PROFITABLE HOBBY

Dear Sir:

Most everybody has some hobby, and my hobby is a profitable one, the raising of pecan trees; especially is this true since I began concentrating on Mahan pecan trees. My four year olds are the talk of the community. As I write this in late July these young trees are laden with clusters of the largest pecans I ever saw. These clusters have from 5 to 9 nuts to the cluster. Only this afternoon I counted on one small limb 32 fast maturing Mahans.

My two year olds are bearing some, but my four year olds as stated above are the pride of my orchard. I wouldn't trade one of the Mahans for any six of the other varieties I have. My only regret is that we didn't get acquainted sooner.

Yours very sincerely,

J. B. PARNELL, Florence, S. C.

MAHAN PECANS AS BIG AS EGGS!

YOU HAVE heard of a pecan as big as an egg, and here it is. This is a photo of two clusters of MAHAN pecans, with an average egg. The very heavy crops MAHAN trees produce are the result of a large number of nuts to the cluster, (Note 6 in one cluster, 9 in the other), and of the giant size of the nuts themselves. It takes only 33 average MAHAN nuts to weigh one pound as compared to 48 to 72 nuts of other improved varieties.

In addition to being a giant in size, the MAHAN has such a thin shell that it cracks almost as easily as a peanut, and is chock full of rich, delicious meat. For home use it is unexcelled, and for commercial plantings the greatest profit producer we have found in over 30 years in the Pecan business.

HERE'S ONE ORDER OF \$450.00 WORTH OF MAHANS READY TO GO. THE CROP FROM EIGHTEEN AVERAGE 9-YEAR OLD MAHAN TREES.

YOUR PROTECTION

Every Genuine Mahan Tree Has This Label Attached

Seven MAHAN pecans measure nearly eighteen inches long

IN A NUT SHELL

Mahan Pecans Give You

- EARLIEST COMMERCIAL CROPS
- MOST NUTS PER CLUSTER
- A REGULAR PRODUCER
- RICH, FINE GRAINED MEAT
- HIGH MEAT PERCENTAGE
- A REAL PAPER SHELL
- THE MOST VIGOROUS GROWER
- HEAVIEST CROPS
- THE EASIEST PECAN TO CRACK

T. M. BEATY PAW CREEK, N. C. WRITES:

"I like the Mahan pecan very much. It is the largest and best pecan grown here. It bears very young and is a fast grower. I have Stuart, Schley, Moneymaker, Success and others, but the Mahan is my choice."

Here's a Baby Mahan
Tree Only 6 Months Old,
and Starting to Bear
Already. Mahans Bear
the Earliest of All.

A Pioneer Grower Reports

For thirty years I have been planting pecans, selecting the so-called standards. I find the Mahan the most vigorous grower, and the earliest and most prolific bearer in my grove.

Counting size, cracking quality, richness and percentage of meat the Mahan has all competition pushed off the board.

It costs no more to plant and cultivate Mahans than any other sort, the only difference being in the larger purchase price which is soon overcome by the higher price the nuts bring.

I would rather plant Mahans at \$5.00 per tree than any other absolutely free.

W. W. HICKS,
Dadeville, Alabama.
